

TESTING CENTER OF EXCELLENCE

Shorter feedback cycles and pressure from digitization is increasing the demand for better application quality. Our testing center of excellence ensures better application quality via a portfolio of our testing services. Our testing services help the organization to stay agile and meet DevOps goal of the continuous delivery model.

WHAT WE DO

Testing Strategy

Our testing strategy addresses challenges around digital testing and helps IT organization to meet digital transformation goal.

Manual and Automation Testing

- Test tool acquisition
- Test planning, design, and development
- Execution and management of tests
- Test program review and assessment

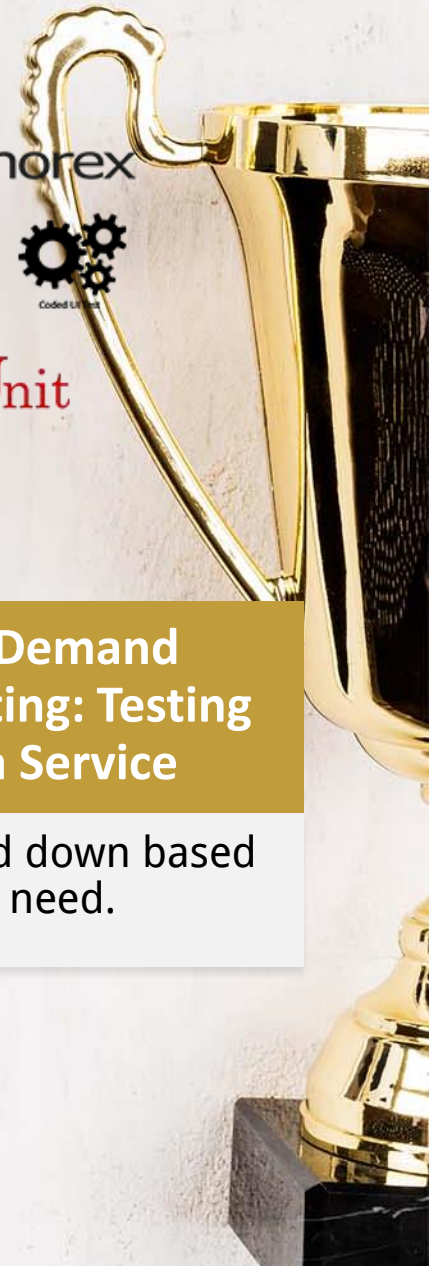

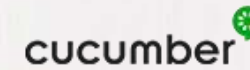

Performance and Security Testing

Implementing and managing security, performance (data volume and user load), automation testing in multi-cloud and on-premise infrastructure using various browsers, and devices

On Demand Testing: Testing As a Service

Scale up and down based on business need.

AI Testing Error Analysis Tool

Our error analysis tool allows you to validate accuracy, transparency, relevance/importance of your AI models with ease.

Automation Robot

Automation robot is an innovative tool that allows testing team members to automate the functional and regression testing of your web apps without knowledge of tools like Selenium.

Testing Data Generator

Our testing data generator tool allows you to create test data with all possible scenarios in no time using our test data generator API.

Testing Best Practices

Our behavior-driven testing approach, templates, and test cases libraries bring specifications, test cases, and test results together into one source of truth.

On-demand Testing Lab

- Mobile testing lab
- Browser testing lab
- OS testing lab
- HIPAA compliant testing lab

[Ask us how our customers saved 80% of testing automation efforts using our **Automation Robot**](#)
